# ATIDS® XE 4.1

## Upgrade Guide

# Upgrade Overview

ATIDS XE is being upgraded to version 4.1.0.36 from version 3.6.1.2. ATIDS XE 4.1.0.36 requires Microsoft .NET Framework version 4.5 or higher to update.

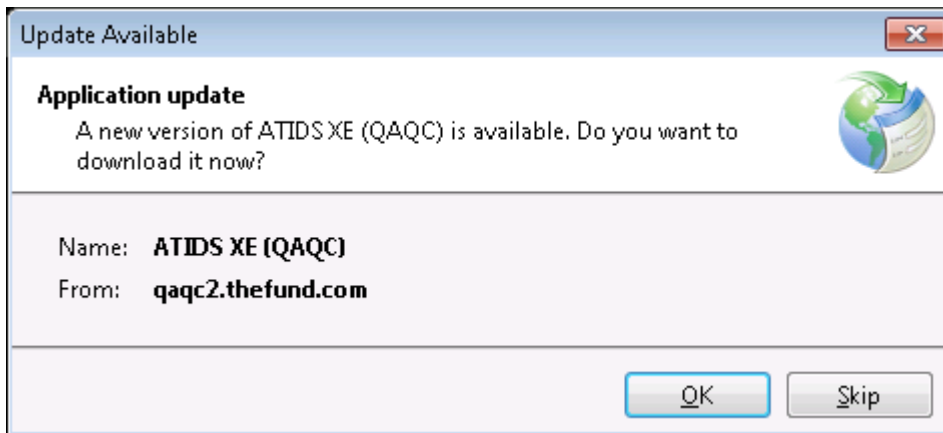

If you do not know what version of Microsoft .NET Framework you have installed on your PC, refer to "[ATIDS XE 4.1 System Readiness Q&A](#)".

It should be noted that the update experience will vary depending on the version of Microsoft .NET Framework installed on the PC. The following instructions provide guidance through the upgrade process and provide you with the necessary steps to follow based on your situation.

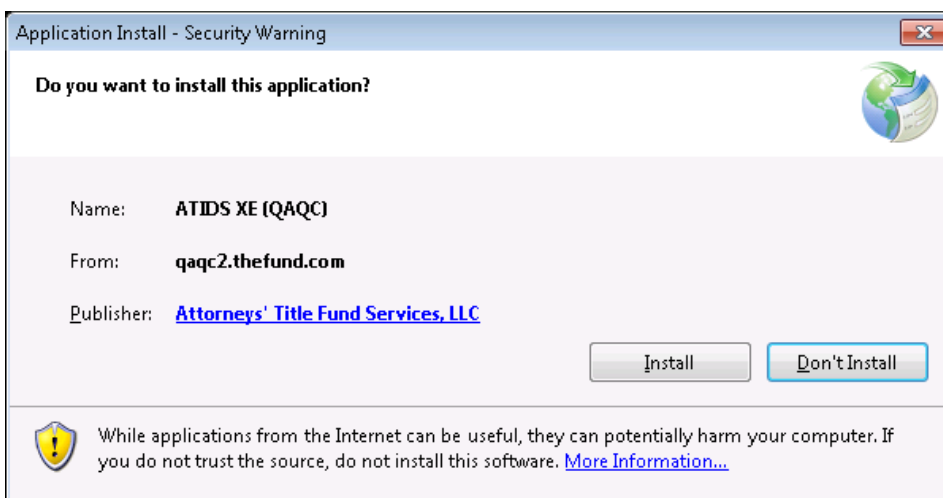

Once version 4.1.0.36 is made available, upon launching ATIDS XE, the upgrade process will start automatically.

# Version Update

1. Begin the installation by confirming you have Microsoft .NET Framework version 4.5 or higher installed.
2. Launch the ATIDS XE program, as normal. The installation will begin automatically.
3. You will be presented with a dialog similar to the following. Select “OK” from this dialog.

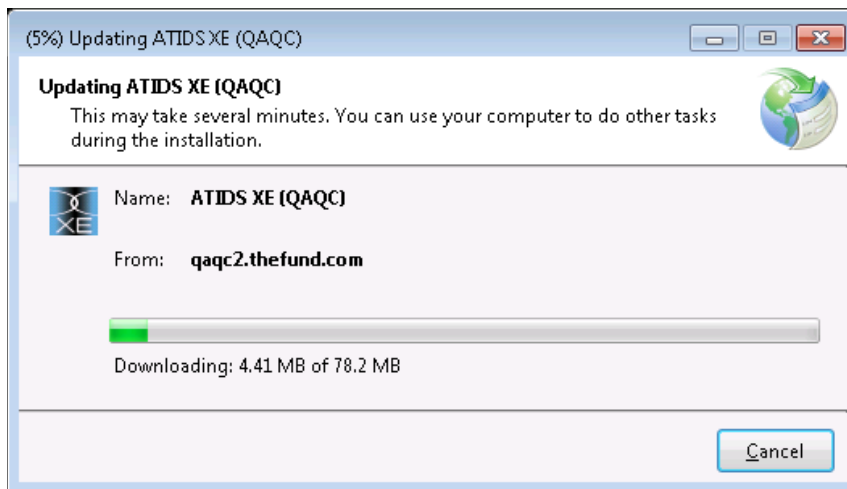

4. You will be presented with a dialog similar to the following. Select “Install” to continue.

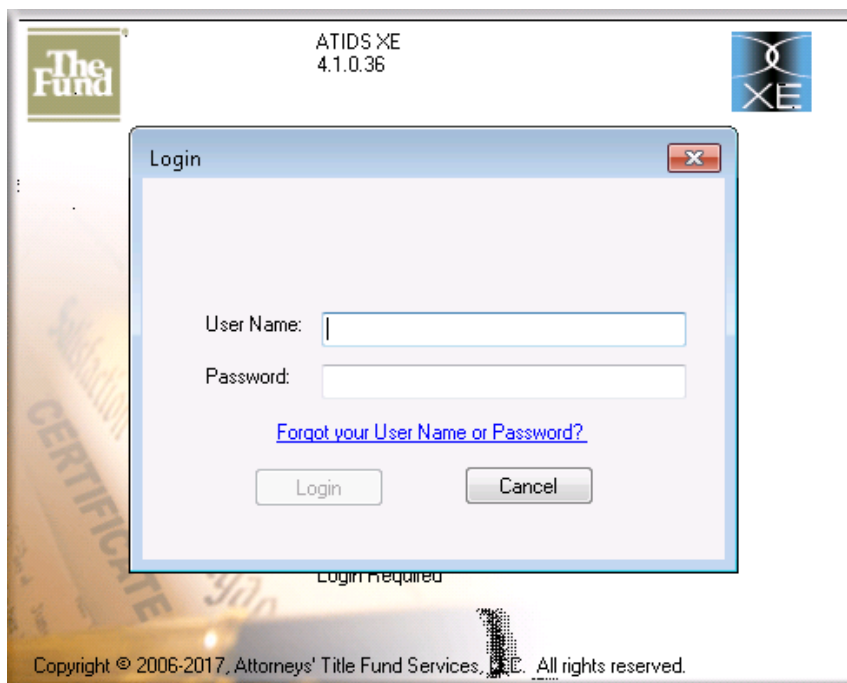

5. This step is where the update experience may differ depending on the version of the .NET Framework that is installed on your PC. One of two possible outcomes may occur:

a. For systems that are running the Microsoft .NET Framework 4.5 or higher, you will see a dialog similar to the following as ATIDS XE 4.1 is being downloaded.

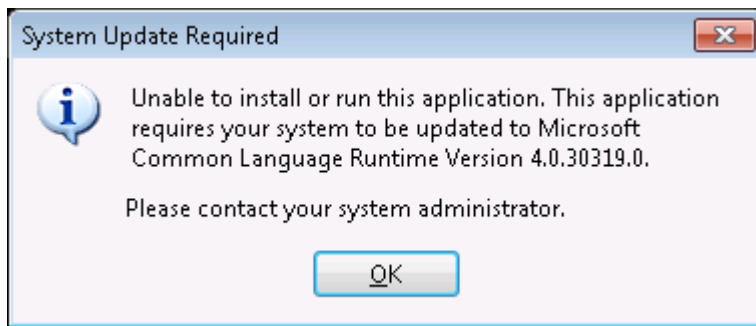

Once the update has been downloaded, the application will automatically start up and the version number of ATIDS XE will be 4.1.0.36 as shown below.

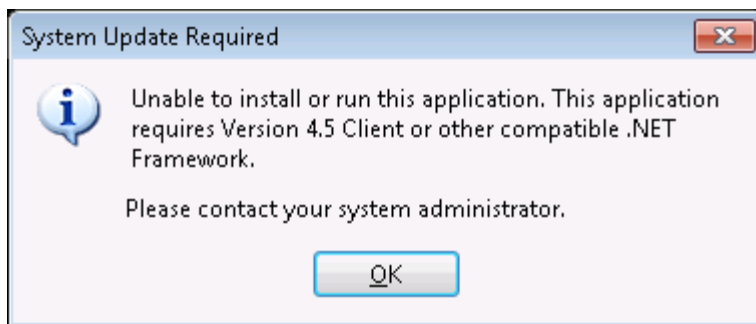

This signifies a successful update to ATIDS XE 4.1.0.36.

b. For systems that do not have Microsoft .Net Framework 4.5 (or higher), you will see one of the “System Update Required” messages. Click Ok to the message, which ends the update process.

*Message 1*

*Message 2*

If you receive one of these messages, you are encouraged to upgrade the Microsoft .NET Framework and proceed with the ATIDS XE 4.1.0.36 update to access the new features provided in the update.

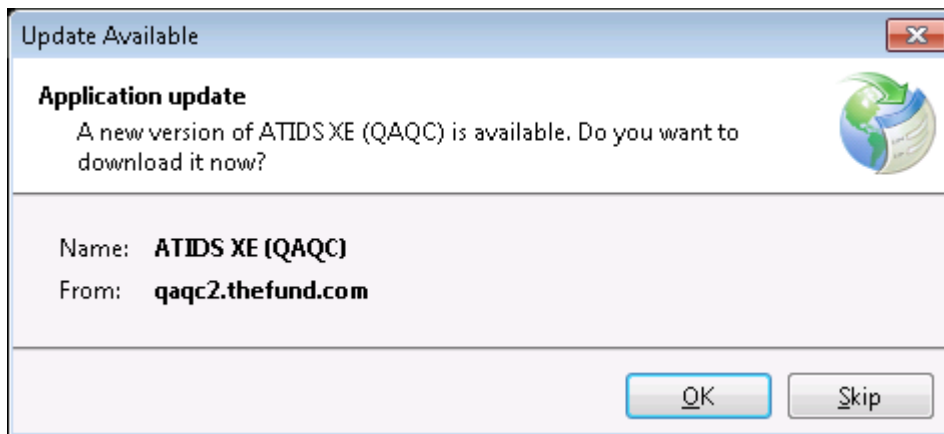

If you cannot proceed with the updates, you will need to ‘Skip’ the Application update, by following the instructions below.

If you skip the update, you will not be prompted for a subsequent update and will require assistance from The Fund’s Help Desk when you are ready to update to the new ATIDS XE version 4.1.0.36.

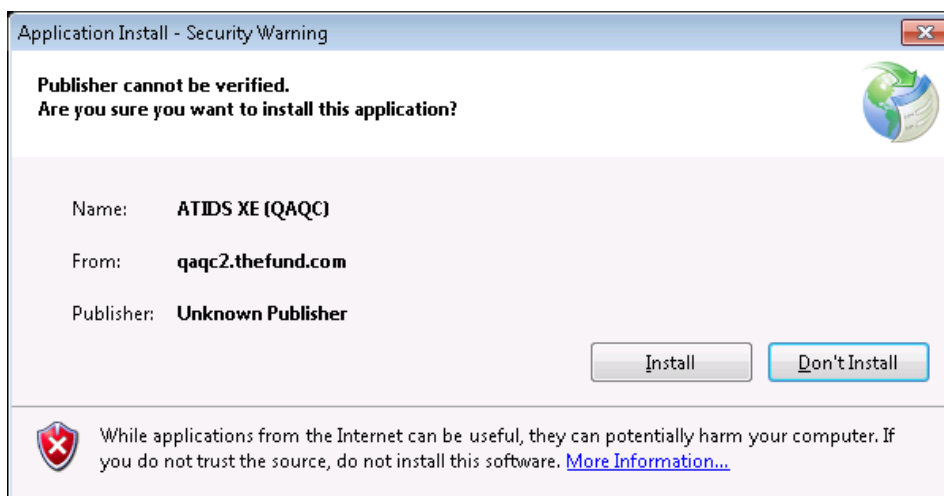

## Skipping the Update

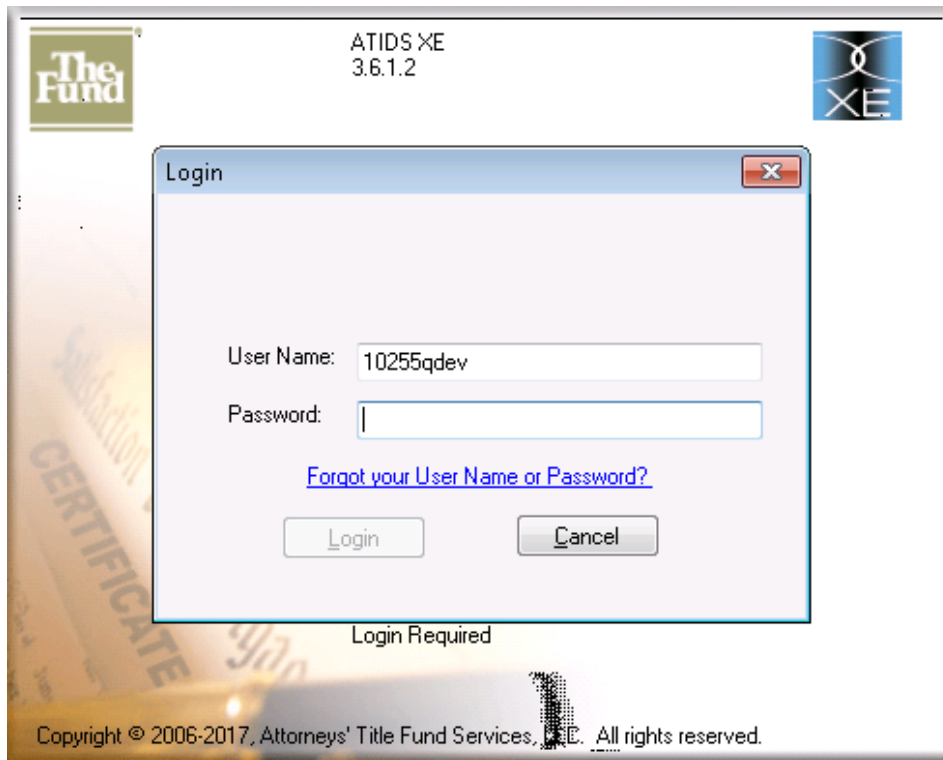

1. To remain on the existing ATIDS XE version 3.6.1.2, execute ATIDS XE from the Start menu as normal. It will attempt to launch the upgrade process again. Click on “Skip” to decline the update.

2. You will receive an Application Install – Security Warning. Click “Install” to revert back to ATIDS XE version 3.6.1.2.

3. The ATIDS XE Version 3.6.1.2 will execute as shown below, by-passing the ATIDS XE4.1.0.36 update and prompting you for your login password.

ATIDS XE Version 3.6.1.2 will remain on your system until you contact The Fund's Help Desk for assistance in updating to the new ATIDS XE 4.1.0.36.
